

OBJECTIVE

The Fund aims in AUD to outperform the MSCI Daily World Total Return Net World Index, after management costs and usual expenses, over rolling 3 to 5 year periods.

STRATEGY

The Fund is an actively managed portfolio of global equities with a high quality bias and which are listed on recognised exchanges. The Fund is exposed principally to high quality international listed companies. It seeks to invest in companies with predictable revenue growth that produce sustainable economic value over the long-term. The Fund can have material exposure to cash where the Portfolio Manager considers this appropriate. Regional positioning is driven by bottom-up stock selection. The investment exposure is not subject to any geographical restrictions except that exposure to 'emerging' market listed companies is limited to no more than 30% of the assets. Sector positioning is also driven by bottom-up stock selection, and the investment exposure is not subject to any sector restrictions.

MONTHLY COMMENTARY

The SPW Global High Quality Fund underperformed the MSCI World Index during the month, with the fund gaining 0.6%. Alibaba (+14.9%) was the top performer for the month, followed by Tencent (+10.6%), with the company continuing its positive momentum from last year. Edwards Lifesciences (+8.8%) and Google (+8.5%) also performed well. Pandora (-15.2%) was the primary laggard, giving back the gains it made in the previous month as margin guidance was lower than expected. We took the weakness as an opportunity to add to our position. NetEase (-9.9%) also struggled this month. We had, however, significantly reduced our position going into the month.
